

# Cross Ripening

## Fruit Ripening

Cross Ripening are world renowned experts in the specialized field of fruit ripening, with many successful installations across Europe, North America, South America and Asia. We use our pioneering ripening control system to ensure that the fruit is in peak condition and ripened to perfection as and when required, benefiting both the consumer and the supplier.

# Cross Ripening

In this dynamic business age, increasing emphasis is placed on reliability and experience because it is imperative that installations are completed accurately and on-time. Cross Ripening can offer you the best team of people in the industry who have the know-how to provide a world-class fruit ripening system that will never let you down.

## Our System

Over the last twenty-five years, we have developed a ripening system that is the envy of the industry. Through constant refinement and innovation, we are continuously evolving so that we can offer the customer an unparalleled level of service. With extensive experience in developing energy efficient solutions, we are able to offer the most economical ripening systems available.

## Total Ripening Control

One of the unique features is our bespoke ripening facility control system. Designed and developed in-house by our own ripening experts, it intelligently controls each aspect of the ripening process resulting in uniform ripening throughout each room and lowered running costs.

As well as controlling each ripening room, the same system can take control of many other aspects of the whole ripening facility and simultaneously monitor and collect energy usage. This provides the user with a complete breakdown of energy usage ultimately enabling them to reduce their energy costs dramatically.

## Experience

With so much experience in the industry, we can offer you peace of mind that the job will be completed on-time and on-budget. We have completed installations across four continents for some of the leading firms in the industry, including Fyffes, JP and Chiquita. We have the team in place to complete installations of all sizes, anywhere in the world. All our installations are supported by the best service and maintenance team in the industry, which means that all Cross installations will run as smoothly years into the future as they do on the day of commissioning.
